

(For Tamiya kit #24345)

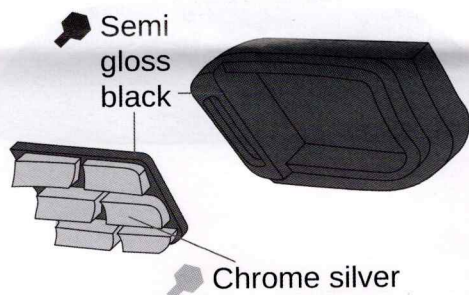

!! IMPORTANT !! READ BEFORE YOUR START

- ★ 3D print parts are sensitive to heat. They may become soft and deform in high temperature. **DO NOT OVERHEATING.** However, a 50-60°C water bath may help to restore to their original shape if your parts had been deformed accidentally.
- ★ The printing resin is not a plastic. They do not react with modeling clements. Please use instant glue for assembly.
- ★ It is unavoidable to leave 3D printing supports residue during the production. Please fill up with putty or remove by sand paper.
- ★ Clean up the parts surface by #1000-1500 wet sand papers. Using a surfacer or primer can enhance adhesion of paints.
- ★ Chrome decals are slightly harder than normal decals due to its metallic nature. Decal softer can be helpful.
- ★ The transkit is compatible with model kit chassis without modification needed.

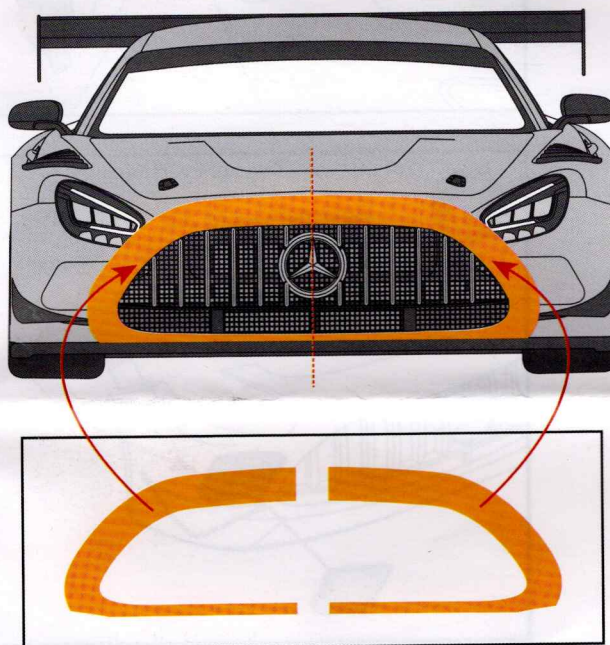

Headlights painting

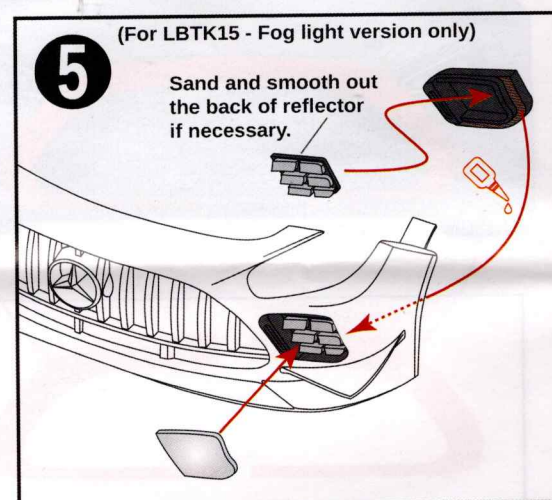

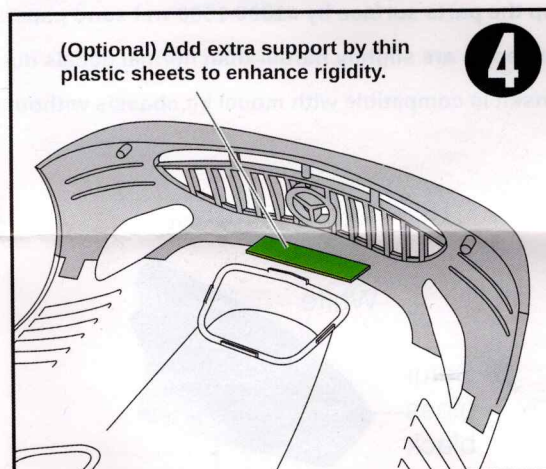

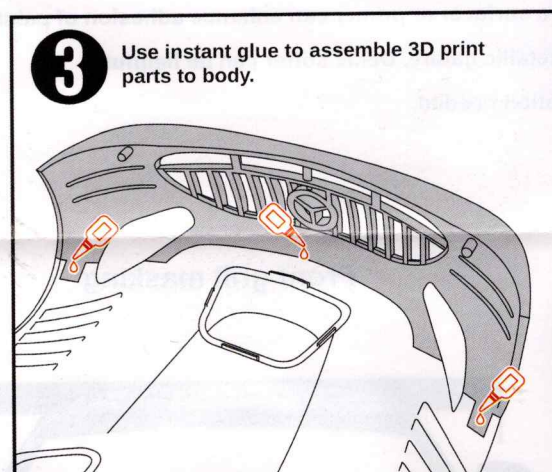

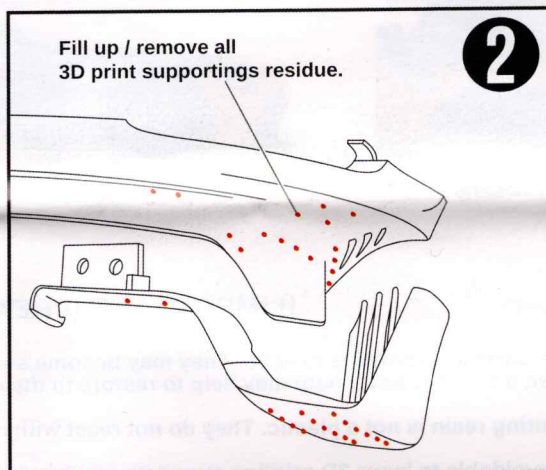

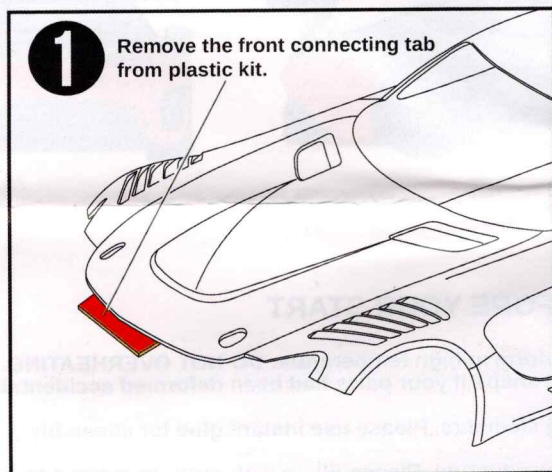

Fog lights painting (for LBTK15 only)
